

**City of Atlanta - Department of Watershed Management  
Sewer Capacity Certification Program  
Application for Sewer Capacity Certification**

**Capacity Evaluation**

Address: \_\_\_\_\_

Building Permit Application No.: \_\_\_\_\_

Date of Certification: \_\_\_\_\_

Net Change in Sewage Flow: \_\_\_\_\_

Downstream Manhole: \_\_\_\_\_

Basin \_\_\_\_\_

Sub-basin \_\_\_\_\_

This Sub-basin is: [ ] Combined [ ] Separate

**Basis of Certification:**

- Capacity is available in the \_\_\_\_\_ WRC
- Capacity is available in the \_\_\_\_\_ Pump Station(s)
- Are any capacity related overflows known along the sewers between the point of new connection and the above WRC: \_\_\_\_\_ YES \_\_\_\_\_ NO
- Proposed connection is in a capacity-limited area: \_\_\_\_\_ YES \_\_\_\_\_ NO  
(If yes, attach documentation)
- Capacity is available in the following trunk sewers from the new connection to the WRC based on observations, survey data or flow data:  
\_\_\_\_\_  
\_\_\_\_\_
- Capacity is limited in the following trunk sewers for which observations, survey or flow data is available:  
\_\_\_\_\_  
\_\_\_\_\_
- Connection is in a predominantly residential area and the number of lots upstream of this additional flow is less than 500 lots for new flows <2,500gpd, or less than 500 minus (the new flow divided by 240 gpd) for new flows ≥2,500gpd:  
\_\_\_\_\_ YES \_\_\_\_\_ NO \_\_\_\_\_ NA (If answer is no, proceed to spot check of sewers, otherwise, continue)

- Connection is in a predominantly residential area and the number of lots both upstream and downstream of this additional flow to the first trunk is less than 500 for new flows <2,500gpd or less than 500 minus (the new flow divided by 240 gpd) for new flows  $\geq 2,500$ gpd:

\_\_\_\_\_ YES \_\_\_\_\_ NO \_\_\_\_\_ NA (If answer is yes, skip the next two bulleted items, otherwise proceed to the next item)

- Spot check of flow depths at the following manholes on the indicated trunks and outfalls for which survey or flow monitoring data is not available indicate that capacity is available (attach field check records):

\_\_\_\_\_  
\_\_\_\_\_

- Other basis of determining that capacity is available in specific sewers as follows:

\_\_\_\_\_  
\_\_\_\_\_

- Connection is in a combined sewer area and additional peak flow is to be balanced by storm-water detention basin for flows  $\geq 2,500$ gpd: \_\_\_\_\_ YES \_\_\_\_\_ NO \_\_\_\_\_ NA

- Other data and information relevant to certification of capacity not covered above:

\_\_\_\_\_  
\_\_\_\_\_

**Our independent analysis as of this date indicates the following:**

CAPACITY IS AVAILABLE

CAPACITY IS AVAILABLE—Pending Assignment of I/I Credits

CAPACITY IS NOT AVAILABLE – Until about \_\_\_\_\_ when the following project(s) are completed: \_\_\_\_\_

\_\_\_\_\_  
\_\_\_\_\_

CAPACITY IS NOT AVAILABLE and a planned project or projects have not been identified and/or scheduled
