NEWS RELEASE

Reminder: Call DWM to save money when filling your swimming pool

July 7, 2006 – As the summer heats up, Department Of Watershed Management officials would like to remind customers to save money by calling 404-658-6500 and scheduling an appointment to have their pools filled. If residents fill their own swimming pools, they will incur sewer charges as well as water charges on their bill for the water used. If the Department uses a nearby fire hydrant to fill a pool, only water charges accrue. The charge for sewer service per ccf (100 cubic feet) is considerably higher than the charge for water service per ccf, so the savings can be significant.
