**Coming Soon...
to a Sewer Near You**

Notice of Dye Testing Work

The City of Atlanta will soon begin Dye Testing work in your area as part of the **Sewer System Evaluation Survey (SSES)**. The SSES is the first step in Atlanta's massive sewer repair program.

- The non-toxic dye is placed inside the sewer system and can identify points where leaks and other defects exist.

- Occasionally we may need to access plumbing inside your home and conduct dye testing to establish where your plumbing connects to the sewer system. Usually a dye tablet is dropped into your toilet and flushed. If access is needed, the testing crew will contact you to schedule a time and date for the testing procedure.
- **Remember: the dye is non-toxic and cleans up with water.**

***We will be working in your
neighborhood for the next __ days.***
